

Mississippi: A Global Leader for Safe, Secure and Sustainable Fuels

Mississippi is emerging as a leader in the world of energy. Governor Haley Barbour has worked to create a business friendly environment, has provided capital investment, and has found ways to use the state's abundant assets, including both manmade and natural resources.

- **Investing in the State of Mississippi's and the Nation's energy infrastructure:** \$5.8 billion in energy infrastructure projects, including storage and pipeline projects, have broken ground during the Barbour Administration. (\$3.75 billion salt dome and \$2.046 billion pipeline)
- **Utilizing Mississippi's abundant resources and developing alternative, affordable, and sustainable sources of energy:** \$9.8 billion in projects have been *announced* in the State of Mississippi involving biofuels, liquefied natural gas, clean coal and coal to liquid, and nuclear power.
- **Pressing for a Promising Future:** The Mississippi Development Authority is actively pursuing and negotiating additional energy-related projects across the state that total \$26,104,000,000.
